

ADUG 2017 Symposium Prize List for Brisbane

Company	Prize	Value Per AU\$	Brisbane Quantity
Code Partners	RAD Studio Enterprise Licence RAD Studio™ is the fastest way to write, compile, package and develop cross-platform native applications with flexible cloud services and broad IoT connectivity from a single codebase. Write once and simply recompile to reach billions of devices natively running Windows, Linux, macOS, iOS and Android. With integrated app-store packaging its easier than ever to reach the Windows 10, macOS, iOS and Android stores, helping your apps sell to the widest audience possible. Product licence only, no maintenance (Update Subscription) included.	\$ 3,500	1
Addictive Software	Addict 4 Professional Addict 4 is a professional native VCL component suite that provides end-to-end solutions for adding spelling check and thesaurus support to your applications. A first-class spelling checker capable of checking nearly any control available. Live-spelling (wavy red underlining of misspelled words) to Edit controls, Memo controls, RichEdit controls and many 3rd party controls. Automatic thesaurus lookup and word replacement to add contextual thesaurus support to your applications. Complete text parsing, dictionary, suggestion, auto-correction and thesaurus APIs for integration into nearly any application.	\$ 393	1
Applying Code	Petra Petra converts Sketch drawings into Delphi (and Oxygene) drawing code. The generated drawing code can use the underlying 2D API or FireMonkey. Petra can generate code for iOS, macOS and Android, in addition to Windows (through FMX).	\$ 39	1
Bergsoft	VCL Components or .NET Controls Winners choice of: - Next Suite Extended , consisting of: - Next Grid 6: Fast, modern and easy to use Delphi (VCL) grid component; - Next DBGrid 6: Fast, modern and easy to use Delphi (VCL) DB grid component; - Next Inspector 6: Modern Object Inspector component with many new innovative item types; - Next Collection 6: Set of dozens handy, attractive and highly customisable VCL components; - Next Editors 6: Set of handy stand-alone edit controls. or! - Next Suite .NET with source, consisting of: Next Grid .NET: Fast, modern and easy to use .NET (WinForms) Grid component; and Next Collection .NET: Set of handy, attractive and highly customisable .NET components.	\$ 249	4
Code Healer Group	CodeHealer CodeHealer is an efficient and powerful source code analysis and verification tool that will help find and fix a significant number of programming bugs, mistakes and inconsistencies in Delphi programs before they are released. The information provided by CodeHealer will also help developers understand and improve existing code that they have not written. CodeHealer is easy to learn and use, and has been designed to provide immediate benefits with a minimum of user effort and input.	\$ 354	1
EC Software	Help+Manual 7 Professional Help+Manual is a documentation tool and content management system for both single and multi-author editing. All publishing formats supported by Help+Manual are generated from the same project. This means you only have to edit your help and documentation once. Forget about the nightmare of “converting” your documentation every time you change anything. Help+Manual publishes all standard Windows help formats, from HTML Help to Webhelp to Visual Studio Help. It also generates Adobe PDF, Microsoft Word documents and ePUB e-books – the standard format supported by the Apple iPad – as well as Amazon Kindle.	\$ 787	1
ESB Consultancy	ESBPCS for VCL ESBPCS for VCL (ESB Professional Computation Suite provides a huge collection of Routines and Components to make Data Entry and Manipulation easier for both Developers and their end-users. This is a collection of over 6000 routines/methods and over 235 classes/components in over 140 units for Embarcadero (formerly CodeGear / Borland) Delphi and C++ which are aimed at making “data entry & manipulation easier” for Developers and their Customers. Components included cover Integer Edits, Float Edits, Hex Edits, IP Address Edits, Percentage Edits, Date Edits, Time Edits, Date/Time Edits, Month Edits, Time Edits, Complex Edits, Fraction Edits, Currency Edits, Calculator Edits, Calendar Edits, Button Edits, Degree/Minute/Second Edits, Comboboxes, Month Comboboxes, Day of Week Comboboxes, Time Zone Comboboxes, Country Comboboxes, Duration Comboboxes, SpinEdits, Month SpinEdit, DOW SpinEdits, Duration SpinEdits, Currency SpinEdits, Vector Edits, Matrix Edits, Calculators, Calendars, Statistical Analysis, Labels, URL Labels, Math Labels, CheckBoxes, RadioGroups, CheckGroups, Memos, RichEdits and much more	\$ 262	1

ESB Consultancy	ESBUnitConv Pro ESBUnitConv Pro is an Enhanced user-friendly Windows Utility to easily convert between units of measurement. Includes Units for Temperature, Distance, Mass, Area, Volume, Pressure, Velocity, Acceleration, Force, Energy, Power, Fuel Consumption, Flow, Torque, Angles, Time, Illumination, Luminous Intensity, Luminance, Luminous Flux, Density, Angular Velocity, Angular Acceleration, Computer Storage, Data Rates, Dynamic Viscosity, Kinematic Viscosity, Electric Charge, Electric Current, Magnetic Flux, Magnetic Flux Density, Quantities, Radiation Absorption, Radiation Dose, Radioactivity and Thermal Conductivity. Includes the ability to log conversions, print, improved clipboard support, integrated help and much more. Also support for Exponential Notation in conversions and in the pop-up calculator. Special support included for SI Units, American Wire Gauge Table, Circle Calculations and Sphere Calculations.	\$ 25	1
Gnostice	XtremeDocumentStudio Delphi Gnostice XtremeDocumentStudio Delphi is the next-generation multi-format document-processing component suite for Delphi/C++Builder. XtremeDocumentStudio includes VCL components for viewing, printing, and converting PDF, DOCX, DOC, RTF, BMP, JPEG, PNG, WMF, EMF, and single-page and multi-page TIFF. It also has report-export components for ACE Reporter, FastReport, QuickReport and ReportBuilder components that can export to PDF, PDF/A, XLSX, RTF, HTML, XHTML, TXT, SVG, PNG, JPEG and GIF formats. PDF/A support includes compliance with PDF/A 1b, 2b, and 3b versions. PDF/A-3b support complies with ZUGFeRD electronic invoicing standard. In future, creation and editing support will be added. XtremeDocumentStudio also includes FireMonkey support. Its FireMonkey document viewer can display PDF, DOCX, DOC, RTF and images on Windows, Mac, iOS and Android platforms.	\$ 789	1
LMD Innovative	LMD VCL Complete LMD VCL Complete includes all current LMD Innovative VCL(.NET) main products including all standalone packs. Features: - Over 740 native components; - Full sourcecode; - Includes all features of LMD-Tools, LMD-EIPack, LMD IDE-Tools and NG Complete; - Extensive demo projects.	\$ 485	1
Mitov Software	Complete set of VCL and Firemonkey components - AnimationLab Time-line based animations; - VideoLab Complex video processing; - SignalLab Very fast digital signal processing (DSP); - LogicLab Components to assist in decision making; - AudioLab Fast audio processing; - VisionLab Fully featured motion detection; - PlotLab Very fast data plotting/charting/graphing; - InstrumentLab Visual instruments and controls; - IntelligenceLab Artificial Intelligence library; - CommunicationLab Basic serial communications.	\$ 1,841	1
Mitov Software	Mitov Runtime licence with source code Cross platform collection of tools, including: - Advanced RTTI; - Containers – Linked List, Array List, Dictionary; - Automatic class management; - Elements – Tuples, MultiProc, SmartPointer, Delegation; - Threading; - OpenCL; - Serialization; - Reflection; - Mixed Persistent Collections; - Component development framework; - Advanced Design Time API	\$ 51	8
NexusDB	NexusDB Professional Edition The NexusDB Professional Edition product is the most advanced SKU level of the NexusDB database products. It includes everything in the Standard Edition, and adds a number of highly secure industry standard data encryption engines. The Professional Edition is delivered with full source code. The Enterprise Manager and nxServer binaries downloaded via the installers already have the appropriate encryption engines compiled in. The engines extend the list of available encryption engines in NexusDB, thus making integration and maintenance of the security pack into existing systems very simple.	\$ 1,150	1
/n software	EldoS SecureBlackbox Professional Delphi Edition Implement comprehensive cryptography, security and protected file transfer functionality with ready-made native Delphi components, complete with source code. Whether you are looking for data encryption, document signing or network transfer, SecureBlackbox has a component to accomplish your task. SecureBlackbox assembles a range of highly integrated Delphi components into an all-in-one security package. All components are native Delphi, have no third-party binaries or references, and no reliance on Windows CryptoAPI. The included security components implement a wide range of application-level protocols, cryptographic and security algorithms and standards. SecureBlackbox allows developing Windows, MacOS and Linux applications implementing secure file transfers, encryption, secure signing, timestamping and validation functionality, secure shell operations, certificate management and Public Key Infrastructure operations.	\$ 2,261	1

/n software	IP*Works! Delphi Edition IP*Works! is a comprehensive framework for Internet development. IP*Works! eliminates the complexity of Internet development, providing programmable, SSL-enabled components that facilitate tasks such as ensuring security, sending email, transferring files, managing networks, browsing the Web, consuming Web Services, etc. Detailed documentation, hundreds of sample applications, fully indexed help files, royalty-free licensing, and more. The Delphi Edition provides native Delphi VCLs for Embarcadero Delphi with no external dependencies.	\$ 1,314	1
/n software	IP*Works! C++ Builder Edition IP*Works! is a comprehensive framework for Internet development. IP*Works! eliminates the complexity of Internet development, providing programmable, SSL-enabled components that facilitate tasks such as ensuring security, sending email, transferring files, managing networks, browsing the Web, consuming Web Services, etc. Detailed documentation, hundreds of sample applications, fully indexed help files, royalty-free licensing, and more. The C++ Builder Edition provides native Embarcadero C++ Builder VCLs, written in C++ and compiled with the C++ Builder compiler for blazing performance.	\$ 2,104	1
Parnassus	Navigator - Individual licence Your code at your fingertips. Ever wanted to jump to the uses clause, to a class's constructor, to a property definition? Navigator lets you move between any section of code quickly, easily, and without your fingers leaving the keyboard. There's also a minimap – a miniature version of your code, showing the structure and letting you scroll just like a scrollbar. Navigator brings all parts of your code to your fingertips, letting you move between methods, classes, types, or in fact unit sections or items of any kind quickly, without disturbing your workflow, and without leaving the keyboard.	\$ 55	1
Parnassus	Navigator - 5 user group licence Your code at your fingertips. Ever wanted to jump to the uses clause, to a class's constructor, to a property definition? Navigator lets you move between any section of code quickly, easily, and without your fingers leaving the keyboard. There's also a minimap – a miniature version of your code, showing the structure and letting you scroll just like a scrollbar. Navigator brings all parts of your code to your fingertips, letting you move between methods, classes, types, or in fact unit sections or items of any kind quickly, without disturbing your workflow, and without leaving the keyboard.	\$ 275	1
Parnassus	Navigator – 10 user group licence Your code at your fingertips. Ever wanted to jump to the uses clause, to a class's constructor, to a property definition? Navigator lets you move between any section of code quickly, easily, and without your fingers leaving the keyboard. There's also a minimap – a miniature version of your code, showing the structure and letting you scroll just like a scrollbar. Navigator brings all parts of your code to your fingertips, letting you move between methods, classes, types, or in fact unit sections or items of any kind quickly, without disturbing your workflow, and without leaving the keyboard.	\$ 550	0
ProDelphi	ProDelphi ProDelphi is a tool to measure the runtime of programs written in Delphi Object Pascal. For 32 bit applications developed with Delphi 5..7, 2005..2010, XE..XE8, 10 and 10.1 (Berlin). The principle of source instrumenting, the sophisticated measurement correction algorithm and the granularity of 1 CPU-cycle guarantee an outstanding measurement accuracy. Even very small or multiple nested functions are measured precisely. After profiling with ProDelphi you know where the bottle neck is, not where it might be. Source instrumenting also ensures that idle times caused by certain Delphi- or Windows- API-functions (e.g. Sleep, MessageBox, WaitForSingleObject etc.) are automatically excluded from measurement. The extremely low measurement overhead guarantees even to measure time critical applications.	\$ 69	1
ProDelphi	ProDelphi64 ProDelphi profiler for 64 bit applications developed with Delphi XE2, Xe8, 10 and 10.1 (Berlin). Refer ProDelphi above.	\$ 104	1
Raize Software	CodeSite Studio CodeSite takes application logging and debugging to a new level by focusing on developer productivity, usability, logging capabilities, and deployment. The CodeSite Logging System gives developers deeper insight into how their code is executing. CodeSite's logging classes let developers capture all kinds of information while their code executes and then send that information to a live display or a log file, locally or remotely.	\$ 525	1

Scalabium Software	SMExport The native Delphi components in this suite provide fast and direct data export into MS Excel, XML, HTML, SPSS, PDF and other formats from a DBGrid, Dataset or any VCL control! SMExport suite 4.99 is a set of component that export data from TDataSet or TDBGrid or any other VCL control (such as TStringGrid, TListView and so on) into such formats as Paradox (if using the BDE) and DBase tables or into a text file (fixed or comma-delimited), HTML, XML, MS Excel, MS Word, PDF, MS Access, SQL-script, Lotus 1-2-3, Quattro, SYLK, DIF, LDAP DIF and other formats.	\$ 69	1
Scalabium Software	SMImport The native Delphi components provide fast and direct importing of data from MS Excel/XML/HTML/DBF/Open Office/Paradox files directly without use of any external libraries! SMImport suite 2.92 is a set of components that can import data into TDataSet (any descendant) from a variety of different file formats. Most components support both loading from file and streams so you may load from memory/blob/cgi streams and/or in multi-tier environments. The SMImport suite also contains a user-friendly wizard, the TSMIWizardDlg component, which is a self-contained wizard which guides end users in the importing of any data at run-time via a user-friendly interface to assist with load parameter settings.	\$ 69	1
Scalabium Software	SMMsg SMMsg suite allow you to read/parse the files created by MS Outlook and any other mailer program. You may read the message with all mail information (subject, body, recipients, attachments etc), contact, note, task, appointment, journal, post item.	\$ 69	1
Steema Software	TeeChart Pro VCL/FMX TeeChart Pro charting component library offers hundreds of Graph styles in 2D and 3D for data visualization, 56 mathematical, statistical and financial Functions for you to choose from together with an unlimited number of axes and 30 Palette components.	\$ 630	1
Steema Software	TeeGrid VCL/FMX TeeGrid is a lightweight, fast and fully featured grid component for Embarcadero RAD Studio, Delphi and C++, VCL and Firemonkey frameworks and Lazarus FreePascal. Full 100% TeeGrid source code is available.	\$ 104	1
Woll2Woll Software	FirePower 7.0 for RAD Studio Data-aware component suite for Win32, Win64, Mac (OSX32), Android and iOS (32 & 64 bit). - Powerful, fast, efficient and flexible grid controls; - Versatile layout grid; - Powerful, fast and efficient list boxes; - Dynamically created data-entry forms; - Advanced lookup combo and lookup dialog controls	\$ 459	1
